Page 2

I - Functionality.

The PrintJob[Archiver] is a comprehensive archival system for the Windows printing system.

Print files are captured by PrintJob[Archiver]. The documents contained in the spool files may be retrieved at any time as well as printed out in a way that is identical the original.

PrintJob[Archiver] runs independently on a client PC or server.

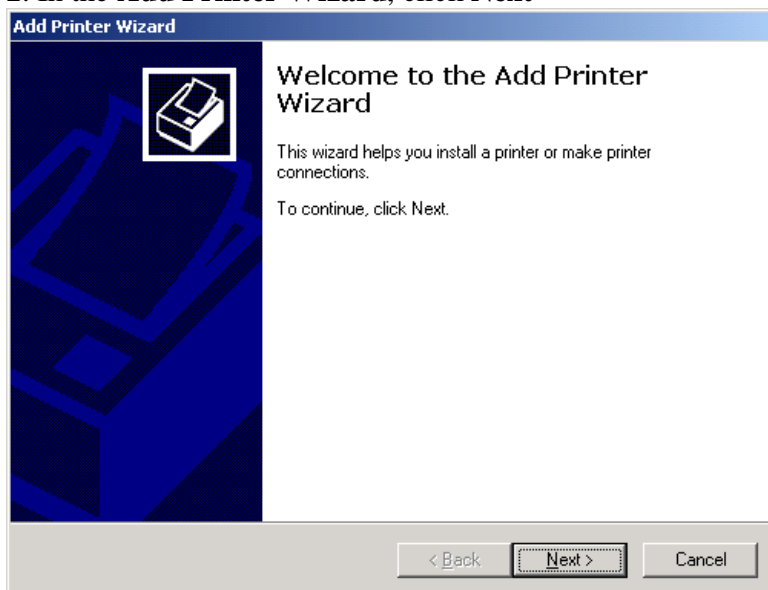

I I - Installation and Configuration.

1. Logon to the Windows 2000 print client as an administrator. Select **Start**, then **Settings**, then **Printers**. The **Printers** folder should now be visible. Double-click on the **Add Printer** icon.

2. In the **Add Printer Wizard**, click **Next**

3. Click the **Local printer** radio button, and then click **Next**

The screenshot shows the 'Add Printer Wizard' dialog box. The title bar reads 'Add Printer Wizard'. The main heading is 'Local or Network Printer' with a sub-heading 'Is the printer attached to your computer?'. There is a printer icon in the top right corner. The main text reads: 'If the printer is directly attached to your computer, click Local printer. If it is attached to another computer, or directly to the network, click Network printer.' There are two radio buttons: 'Local printer' (which is selected) and 'Network printer'. Under 'Local printer', there is a checkbox for 'Automatically detect and install my Plug and Play printer'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

4. Click Create a **new port**, and then click Standard TCP/IP Port.

The screenshot shows the 'Add Printer Wizard' dialog box. The title bar reads 'Add Printer Wizard'. The main heading is 'Select the Printer Port' with a sub-heading 'Computers communicate with printers through ports.' There is a printer icon in the top right corner. The main text reads: 'Select the port you want your printer to use. If the port is not listed, you can create a new port.' There are two radio buttons: 'Use the following port:' and 'Create a new port:' (which is selected). Under 'Use the following port:', there is a table with three columns: 'Port', 'Description', and 'Printer'. The table contains the following rows:

Port	Description	Printer
LPT1:	Printer Port	
LPT2:	Printer Port	
LPT3:	Printer Port	
COM1:	Serial Port	
COM2:	Serial Port	
COM3:	Serial Port	

Below the table, there is a note: 'Note: Most computers use the LPT1: port to communicate with a local printer.' Under 'Create a new port:', there is a 'Type:' label and a dropdown menu with 'Standard TCP/IP Port' selected. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

5. Click Next

6. Determine IP Address for **PrintJob[Archiver]** connection.

6.1 Determine IP Address with PrintJob[Archiver], see **step 7.**

Or

6.1 **IPCONFIG**

- a) Click Start button Click Run
- b) Type cmd in the Open text box
- c) Click OK.
- d) Type ipconfig and press <enter> on the prompt line in the black screen. **Note the IP address.** Click the X at top right of black window to close window.

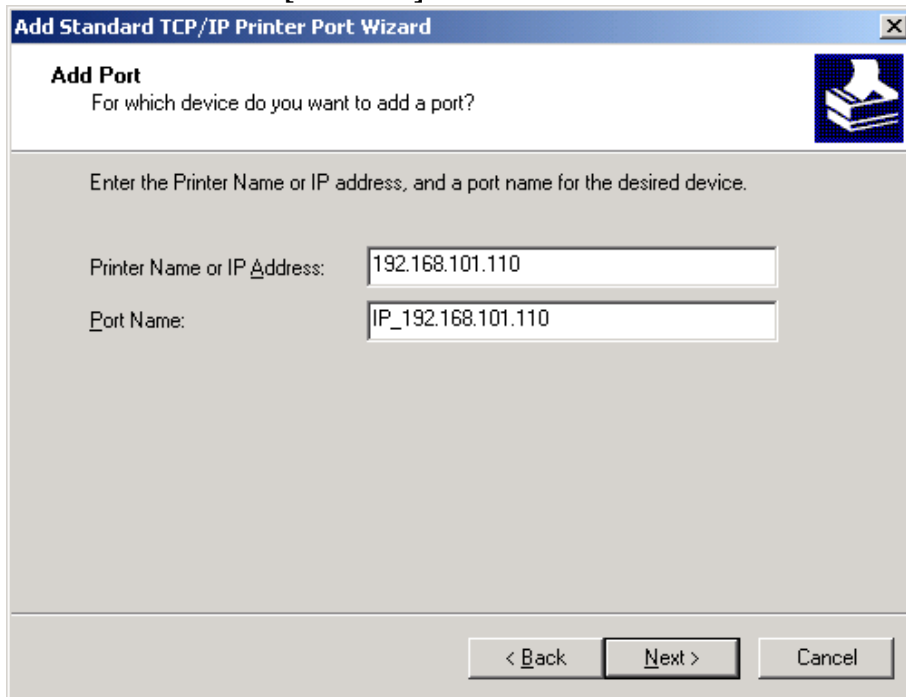

7. Start **PrintJob[Archiver]** and click Info

7.1 Server IP **PrintJob[Archiver]** address is 192.168.101.110

7. Enter the **PrintJob[Archiver]** server IP address.

Add Standard TCP/IP Printer Port Wizard

Add Port
For which device do you want to add a port?

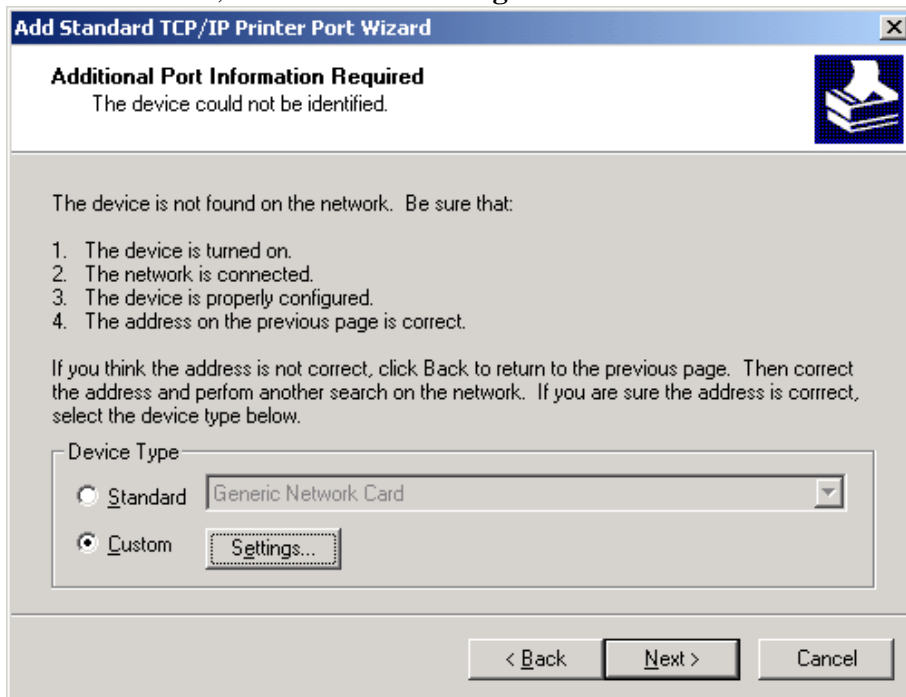

Enter the Printer Name or IP address, and a port name for the desired device.

Printer Name or IP Address: 192.168.101.110

Port Name: IP_192.168.101.110

< Back Next > Cancel

4. Click **Custom**, and then click **Settings....**

Add Standard TCP/IP Printer Port Wizard

Additional Port Information Required
The device could not be identified.

The device is not found on the network. Be sure that:

1. The device is turned on.
2. The network is connected.
3. The device is properly configured.
4. The address on the previous page is correct.

If you think the address is not correct, click Back to return to the previous page. Then correct the address and perform another search on the network. If you are sure the address is correct, select the device type below.

Device Type

Standard Generic Network Card

5. Click **Finish**.

Add Standard TCP/IP Printer Port Wizard

Completing the Add Standard TCP/IP Printer Port Wizard

You have selected a port with the following characteristics.

SNMP: No

Protocol: LPR, Archiv

Device: 192.168.101.110

Port Name: IP_192.168.101.110

Adapter Type:

To complete this wizard, click Finish.

< Back Finish Cancel

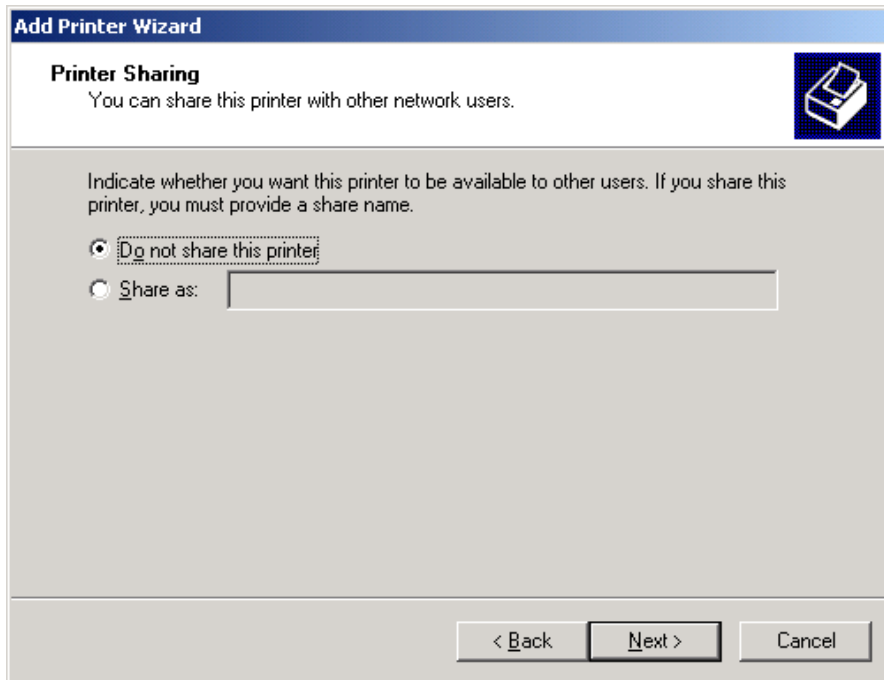

6. Select the correct printer (for example Hp LaserJet 4).

7. Enter a Printer name + (Archiv).

8. Click **Next**.

Add Printer Wizard

Printer Sharing
You can share this printer with other network users.

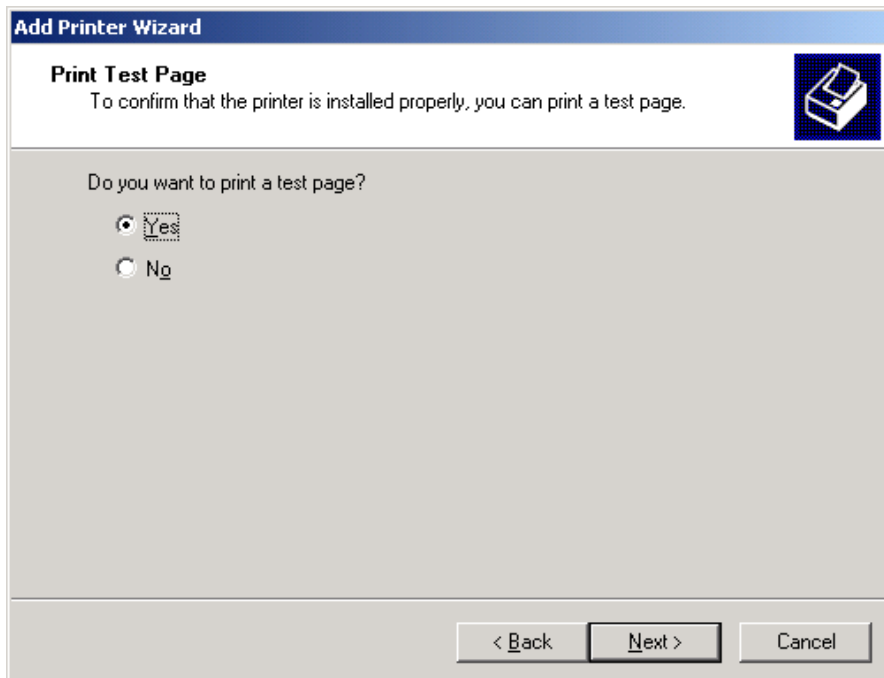

Indicate whether you want this printer to be available to other users. If you share this printer, you must provide a share name.

Do not share this printer

Share as:

< Back Next > Cancel

9. Click **Yes** then **Next**.

Add Printer Wizard

Print Test Page
To confirm that the printer is installed properly, you can print a test page.

Do you want to print a test page?

Yes

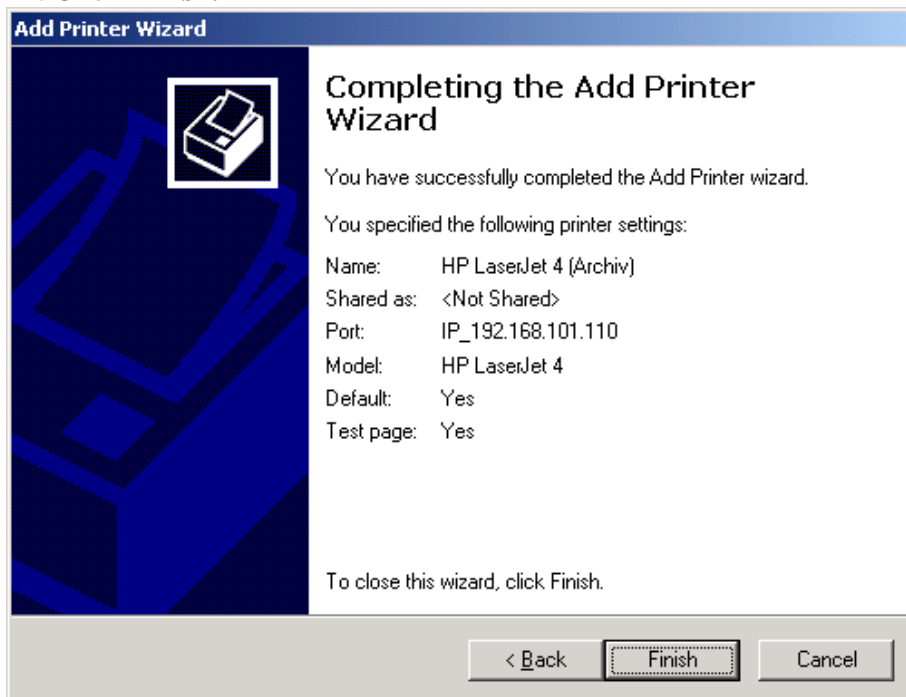

No

< Back Next > Cancel

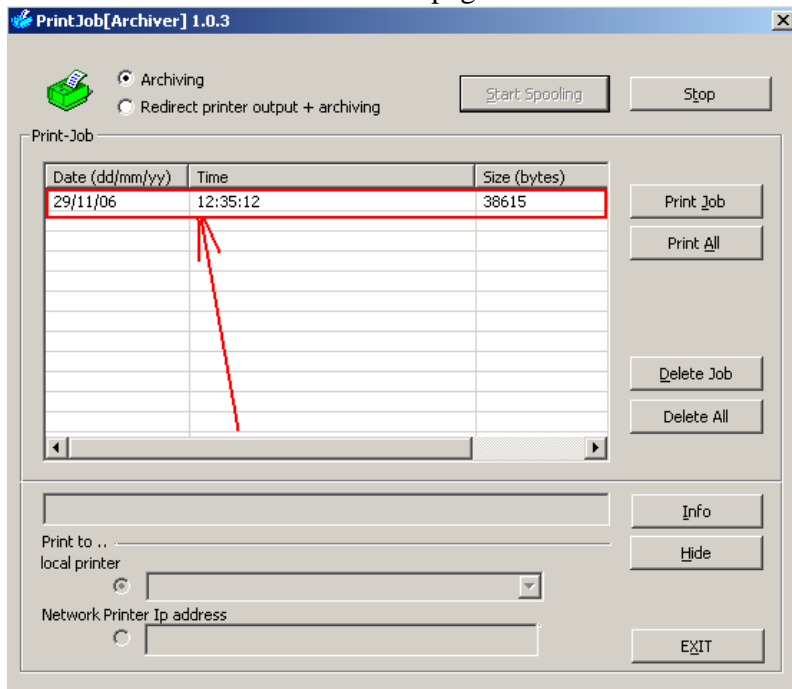

10. Click **Archiving** and **Start Spooling**.

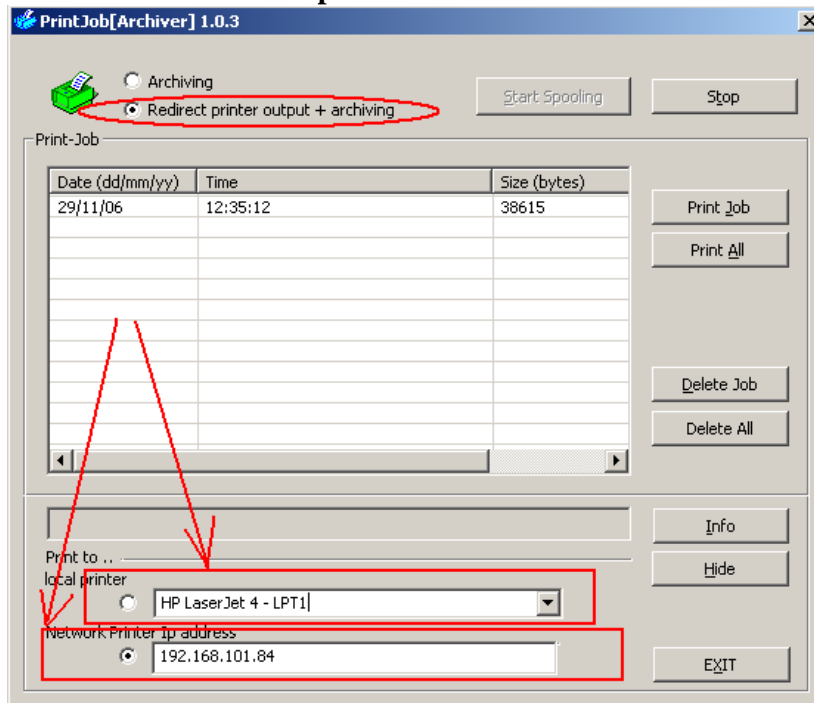

11. Click **Finish**.

12. The archived document “Test page” is now visible.

13. If parallel printing and archiving is needed, click **Redirect printer output + archiving**. For this option, it is necessary to enter the **Network Printer IP address** or select an **Installed local printer**.

14. Notice, it shows here that **PrintJob[Archiver]** sent a print job to **192.168.101.84 port 9100 (HP LaserJet 4 - Network Printer)**.

15. Notice, it shows here that PrintJob[Archiver] sent a print job to **local printer LPT1**
